### IGES Group continues internationalisation and joins the athagoras Group

**Berlin, March 20, 2025 (IGES Institute)** – The companies in the IGES Group have been working on issues relating to health, mobility, education and housing for their clients since 1980. Their clients include the public sector, funding providers and the industrial healthcare sector.

The IGES Group has experienced strong growth in recent years and is now represented by its own companies in six member countries of the European Union and in the UK. Through internationalisation, cooperation and the development of AI-supported tools, the Group creates added value for its clients because it boasts in-depth knowledge of the European healthcare and reimbursement systems. The IGES Group joined the athagoras Group in March 2025 in order to drive forward internationalisation and expertise in the healthcare sector in a consistent and future-oriented manner.

The businesses of IGES Mobility and FUB IGES Wohnen, Immobilien, Umwelt, which had also been part of the IGES Group up to now, will continue to operate under the same name outside the athagoras Group.

“The integration of IGES into the athagoras Group with its robust companies in the areas of digitalisation, data management, real-world evidence and regulatory affairs creates optimal synergies for all our client groups,” said Professor Dr Bertram Häussler, Chairman of the IGES Group.

“IGES is now in a position to offer its international public and private clients in the healthcare sector an even stronger platform in the athagoras network. Within this alliance, we can make optimal use of our expertise in the areas of healthcare systems, health technology assessment, market access, medical technology and pharmaceuticals in a future-centric, data-based and AI-supported manner,” Häussler continued.

“Thanks to the IGES Group, the companies in the athagoras Group will become integrated providers in the area of life sciences, innovation and healthcare systems,” explained Dr Roman-Marcus Rittweger, CEO of athagoras. “The IGES Group optimally complements our existing competencies in order to master the challenges of our clients in complex healthcare systems. I am delighted that we have been able to secure Bertram Häussler for this integration. In his capacity as Chairman of the unchanged Management Board, he will head up the IGES companies as part of the athagoras Group”.

### About the IGES Group

The IGES Group is a network of research and consulting companies in Europe specialising in the field of healthcare. The core of the group is the IGES Institute, founded in 1980, which works on issues relating to European healthcare systems and is now one of the largest private-sector companies in this field in Germany. In addition, the Group has several specialist subsidiaries in seven European countries that provide services to the international life science industries. The IGES Group has a workforce of more than 200 highly qualified individuals.
